

ADR AUTOWRAPPER

SEMI-AUTOMATIC CELLOPHANE OVERWRAPPER

FEATURES:

- Easy to use Cellophane Overwrapper
- Supports products of various sizes
- Quick format change with adapters
- Nice folding cellophane finish
- Adaptable to LAB510S Labeller
- Combine with EZ Wrapper/Speedstar
- „Two-button-start“ safety control
- Safety cover with door
- Optional table available
- Made in Germany

The ADR AUTOWRAPPER is a semiautomatic cellophane overwrapper. It folds the right and left side and welds the cellophane to a nice finish. You need to add another product to create the first welding on the long side. So you can use the ADR EZ Wrapper or the ADR SPEEDSTAR I & III to have a full overwrapping solution. The ADR AUTOWRAPPER can be combined with ADR labelling equipment in line. So you can add a label automatically to the wrapped product. The system comes with one set of adapters fitting to your product needs. We offer additional adapters to each format. This way you can change formats in only a couple of minutes !

ADR AUTOWRAPPER
